To our customers of Cloverdale Sanitary District:

Currently we have an aging infrastructure that requires major upgrades in order to keep up with the increased consumer usage and requirements mandated by DEQ. Upon inspection of the current Sewer Plant and Plant equipment, it is necessary for the district to increase sewer rates in order to cover increased cost of required maintenance and repairs. After reviewing historical documents, we have found that the last rate increase was completed in 2001. At this time, we are proposing a \$5.00, per month, increase to our residential customers and an overall 25% rate increase to our commercial customers.

A public hearing for this proposal will be held on August 6, 2008, and September 3, 2008, at 7:00 pm, at the Cloverdale Sanitary District, 34540 Highway 101 South, Cloverdale, OR 97135.
